

OJ Utter is the owner and Chief Analysis Consultant of Utter Precision, Inc. A reliability maintenance sales, training and consulting firm based in Nebraska. OJ is a certified Level I airborne ultrasound technician, Level II vibration analyst, and Level II infrared thermographer. He is the only trainer in the Midwest whose certifications and experience allow him to deliver training on the entire spectrum of reliability programs. Utter Precision offers reliability program services, in-house program establishment and implementation training and consulting for vibration, infrared, airborne ultrasound, sheave and coupling laser alignment, and electronic balancing.

He also holds a commercial pilots license, and is a certified agricultural pilot. UPI is involved in all aspects of reliability based maintenance programs from infrared thermography, vibration analysis, balancing, laser alignments, to power quality analysis and airborne ultrasound testing.

OJ is the local sales representative for FLIR infrared cameras, Datastick Systems vibration analyzers, Vibralign Laser Alignment Systems, and Superior Signal Ultrasonic Units.

He is here today to speak about the emerging new technology in reliability maintenance.
